

Applications

Custom imprinting on two-way radio batteries can be used for identification of rental radios, confirming “property of,” or to give visibility to an organization’s brand.

The imprint can be text with one or more colors and can even include a 4-color logo. The ink is highly durable and will not rub off during the service life of the battery.

Available Batteries

Most batteries for the radios listed below are available for custom printing. This is a partial listing of the more popular radios, so please inquire if your radio model is not included.

Radio Models
Motorola CP150 / CP200 / CP250 / EP450 / PR400

Relm BK (DPH / GPH)
Relm KNG Series
Vertex Standard VX-820 / VX-920

Can OEM Batteries Be Custom Printed?

In general, any OEM battery equivalent to a Multiplier battery can be custom imprinted. A sample of the OEM battery is required in order to provide final confirmation.

Order Quantity

The minimum order quantity is 50 Multiplier batteries or 100 OEM batteries. The order quantity may be mixed within a model type and have up to two different imprints. For example, 40 batteries of MXKNB57LIP could be printed with “warehouse” and 10 batteries of M4497 could be printed with “front desk.”

Order Lead Time / Quotes

Generally, orders will ship within 7 business days of artwork approval. Please contact your Multiplier reseller for a quotation.

Approvals / Returns

Artwork for custom imprinting must be approved in writing (email). Once the artwork is approved, the order may not be cancelled or decreased. Custom printed batteries may not be returned, except when defective as covered by our warranty policy.

For More Information

Contact your Multiplier reseller or call 800-529-1618 x139.
